ATLAS
Industrial Solutions

COMPANY PROFILE · 2026

We build the facilities where industry produces.

Turnkey factory construction, machinery foundations and in-house steel manufacturing — one accountable partner from design to the start of production.

ISO 9001 | ISO 14001 | ISO 45001

Production-oriented design. Production-friendly facilities.

Since 2020, Atlas Industrial Solutions SRL has been delivering facility construction, installation and industrial equipment production for companies from many sectors — mostly the automotive industry.

Our metal design, forming and manufacturing infrastructure, together with our dynamic team, is our greatest strength in fast, economical and high-quality construction work. We develop tailored solutions in a total of 15,000 m² of indoor and outdoor areas across our campuses.

As a general contractor we have completed 25 turnkey projects and more than 200 individual projects, from small in-plant works to complete factory buildings. We create value with result-oriented, producer-friendly structures and practices, and with innovative approaches that go beyond traditional construction habits.

What sets us apart is our own metal design and manufacturing infrastructure. We engineer, fabricate and build with our own teams, which gives our clients speed, cost control and a single point of responsibility.

Mission

To deliver production facilities that are fast to build, economical to run and designed around the people and processes inside them.

Vision

To be the first-choice industrial contractor in Romania for manufacturers who value speed, reliability and engineering quality.

01

Result-oriented

Clear scope, realistic schedules and a single point of contact from design to handover.

02

Producer-friendly

We work around running production and plan every detail for the people who will use the facility.

03

Reliable

We keep our commitments on time, cost and quality — the reason clients return to us.

04

Innovative

We prefer practical, modern solutions over “the way it has always been done”.

Built around the needs of manufacturers

Our journey

2020 — **Company founded**
Atlas Industrial Solutions starts operations in Pitești, Argeș, serving manufacturers in the region.

2022 — **Lowbay factory expansion**
An 8,000 m² factory expansion for Beyçelik Gestamp Romania.

2023 — **Extension and a new factory**
A 2,200 m² production extension for Coşkunöz MA; construction of the BGR2 factory begins.

2024 — **BGR2 robotic factory**
The 19,000 m² robot-based BGR2 factory for Beyçelik Gestamp, a 900 m² production annex and a 1,600-ton press foundation.

2025 — **Growing beyond Argeș**
Construction management for a 7,500 m² logistics facility in Bragadiru, Ilfov.

Today — **25 turnkey · 200+ individual projects**
A 53,000-tonne silo complex under construction in Timiș and our Atlas Park industrial zone investment.

We renew, expand and future-proof your facility without stopping production.

01

Turnkey Facility Construction

Complete factory and industrial buildings, from design to the start of production.

02

In-Plant Revision Works

Modifications and upgrades inside running factories, with minimal downtime.

03

Machinery Foundations & Production Lines

Press foundations and production line installations, concrete and steel.

04

Industrial Equipment Design & Production

Custom steel equipment that makes production safer and faster.

05

Organized Industrial Zone Investment

An organized industrial zone built for the needs of manufacturers.

How we work

01

Consultation

We listen to your production requirements, site conditions and schedule, and define the scope together.

02

Design & engineering

Architectural, structural and steel design developed around your process flow and machinery.

03

Manufacturing

Steel structures and equipment are fabricated in our own workshops, in parallel with site works.

04

Construction

Foundations, erection, cladding and finishes — delivered by our own teams with a single site manager.

05

Handover & support

Commissioning support, documentation and fast response for future revisions and extensions.

04 FEATURED PROJECT

BGR2 Robotic Factory

BEYÇELIK GESTAMP ROMANIA · ARGEȘ · 2023–2024

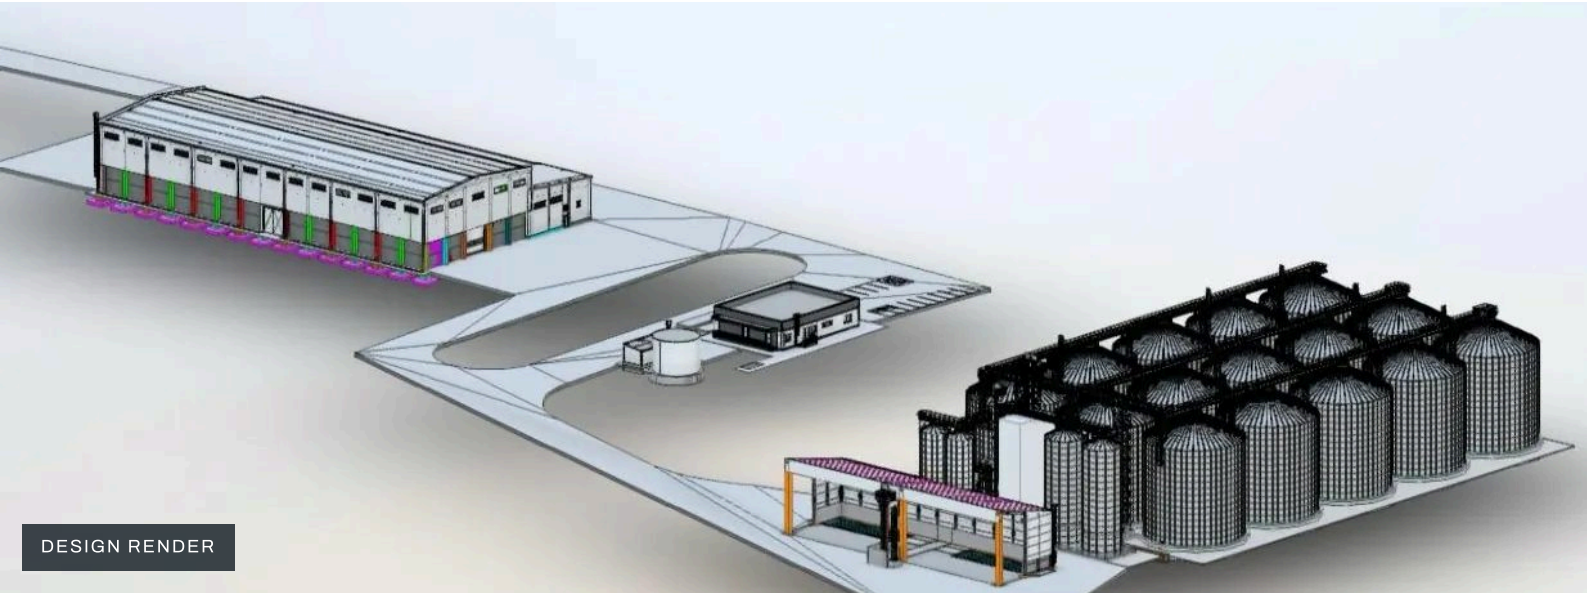
A 19,000 m² robot-based production facility for Beyçelik Gestamp Romania — built turnkey in Argeș County, from the first foundations to a plant ready for automated production.

19,000 m²	Robotic	Turnkey
PRODUCTION FACILITY	FACTORY CONCEPT	DELIVERY MODEL

05 PROJECT IN PROGRESS

KC Timiș Silo Complex

KC TIMIȘ MANAGEMENT · BUZIAȘ, TIMIȘ · 2026



DESIGN RENDER

Construction of a storage and conditioning facility for agricultural products in Buziaș, Timiș County, with a total storage capacity of 53,000 tonnes: a battery of 15 silos of 3,000 tonnes each with a grain dryer, a storage hall for 8,000 tonnes of conventional and organic grain, a weighbridge building with laboratory and offices, and the related utilities, on a 56,000 m² site. Works started in August 2026.

ON SITE · 2026

Factories and production facilities we delivered

NGB – NEXT GENERATION BUILDINGS · 2025

Logistics Centre, Bragadiru

Construction management for a logistics centre in Bragadiru, Ilfov County, just outside Bucharest: 4,040 m² under roof within a 7,500 m² usable facility.

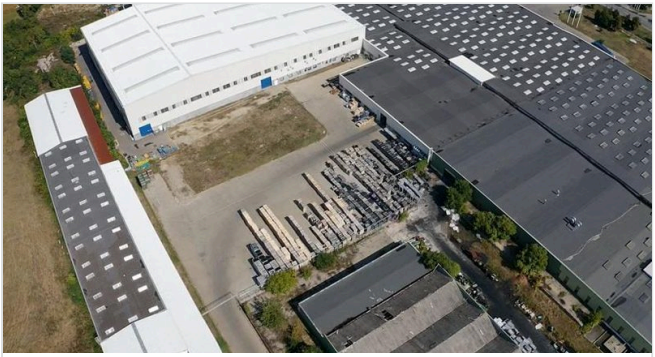
4,040 m² INDOOR AREA · **7,500** m² USABLE FACILITY

BEYÇELIK GESTAMP ROMANIA · 2024

Battery Tray Building

A 900 m² production annex joined to the existing Beyçelik Gestamp plant — foundations, steel structure and sandwich-panel envelope, delivered turnkey.

900 m² PRODUCTION ANNEX

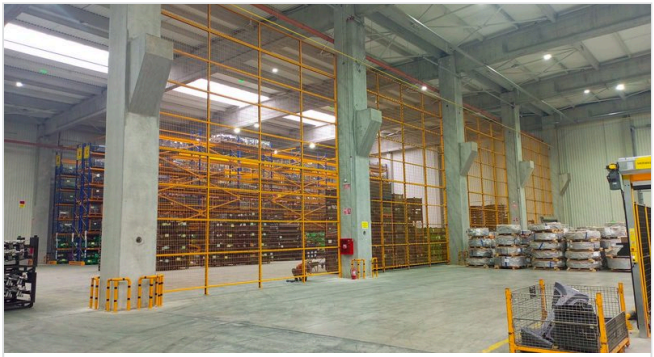


COŞKUNÖZ MA · 2023

Production Extension

A 2,200 m² production extension for Coşkunöz MA in Argeș County — new manufacturing space added to the existing plant and delivered turnkey.

2,200 m² PRODUCTION EXTENSION



BEYÇELIK GESTAMP ROMANIA · 2022

Lowbay Factory Expansion

An 8,000 m² enlargement of the Beyçelik Gestamp plant — new production space that expanded the factory's output, delivered turnkey and ready for operation.

8,000 m² FACTORY EXPANSION

07 MACHINERY FOUNDATIONS

1,600-ton progressive press foundation

COŞKUNÖZ MA · ARGEŞ · 2024

For Coşkunöz MA we built the foundation of a 1,600-ton progressive press inside the operating plant — deep reinforced-concrete pit, anchor plates and precision concrete works — and closed the press area with a steel perimeter enclosure.

1,600 t	Steel	2024
PROGRESSIVE PRESS	PERIMETER ENCLOSURE	COMPLETED

We deliver all the concrete and steel manufacturing required for press foundations and production line installations in factories — from excavation and reinforced-concrete pits to anchor frames and steel supports — as fast as possible.

Our own investments in Ilfov County

CORBEANCA, ILFOV · PLANNED · Q2 2027

Atlas Park Industrial & Logistics Park

Atlas Park is a planned industrial and logistics park in Corbeanca, Ilfov County, north of Bucharest. The site is divided into plots for production and warehouse buildings, served by one-way internal roads, with a commercial and services area and a landscaped green zone. Construction is scheduled to start in Q2 2027.

CORBEANCA, ILFOV · CONCEPT DESIGN

Atlas Residence Villa Community

Atlas Residence is a gated community of 85 detached villas in Corbeanca, Ilfov County, designed by Atlas Industrial Solutions. Four villa types share one modern architecture of black metal cladding, warm wood and large glazed façades: compact homes, classic villas with a private pool, corner villas and 15 premium villas whose gardens open onto the forest. A 3,000 m² clubhouse area at the entrance offers a gym, swimming pool, padel court and playground, and tree-lined loop roads connect every home.

85	55	60,000 m²	3,000 m²
DETACHED VILLAS	VILLAS WITH PRIVATE POOL	SITE AREA	CLUBHOUSE & SHARED GARDEN

Visualisation and site plan are illustrative and may change during design and permitting.

15,000 m² of production and storage areas

Across our campuses we operate a total of 15,000 m² of indoor and outdoor areas for steel fabrication, pre-assembly and material storage. Producing structures and equipment in-house allows us to fabricate while foundations are being built on site — shortening schedules significantly.

What we do in-house

01

Steel design & engineering

Structural and steel detailing developed by our own design team, coordinated with architecture and building services.

02

Steel fabrication

Cutting, forming, welding and assembly of steel structures, platforms, frames and custom equipment.

03

Concrete & foundations

Machinery foundations, pits, slabs and reinforced-concrete works executed by our own crews.

04

Erection & installation

Steel erection, cladding and installation teams with the equipment to work in running plants.

05

Project management

Planning, procurement, site management and documentation from one coordinated team.

06

Equipment production

Transport racks, storage frames and production aids designed for safer, faster processes.

Quality, health, safety & environment

Quality

We plan, inspect and document our work at every stage — from material receipt and fabrication to final handover — so that what we deliver matches what was designed.

ISO 9001:2015

Occupational health & safety

Nobody should get hurt on our sites. We plan work methods, train our teams and coordinate closely with plant management when working inside operating facilities.

ISO 45001:2018

Environment

We aim to minimise waste, noise and dust, and to use materials and energy responsibly on every site and in our workshops.

ISO 14001:2015

Certified management systems

Our quality, environmental and occupational health & safety management systems are certified by Management Certification (Romania) for construction works on residential and non-residential buildings.

ISO 9001:2015

Quality management system

Certificate no.: C-MC 6898 · Valid until: 04.08.2027

ISO 14001:2015

Environmental management system

Certificate no.: M-MC 5719 · Valid until: 04.08.2027

ISO 45001:2018

Occupational health & safety management system

Certificate no.: S-MC 4022 · Valid until: 04.08.2027

Our HSE and quality commitments apply equally to our own employees and to all subcontractors working on our sites.

CLIENTS

Manufacturers and developers who trust us with their facilities.

SECTORS

Automotive suppliers

Press shops, body-in-white and battery components plants with demanding schedules.

Steel & metal processing

Heavy foundations, crane runways and production halls for metal processing.

Logistics & storage

Warehouses, storage units and annex buildings integrated with running plants.

Industrial developers

Construction management and build-to-suit facilities for investors.
